

Wireless Screen Sharing

ELPWP10

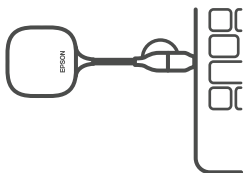

EPSON
EXCEED YOUR VISION

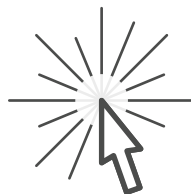

Let's Share

Epson's new Wireless Screen Sharing device enhances your productivity by making it easier than ever to share your screen.

1 Plug into a Laptop!

2 Click the Button!

3 Collaborate on the Big Screen!

Declutter your meeting space!

WIRED

WIRELESS

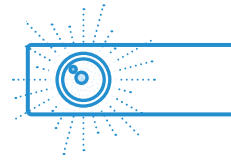

1 Plug into a Laptop!

Just Plug the Transmitter into Your Laptop!

To connect, just plug the transmitter into a USB port on your laptop. No need to worry about wireless settings or cables. No special software needs to be installed. No advance preparation. It's that easy.

Automatic Start-up

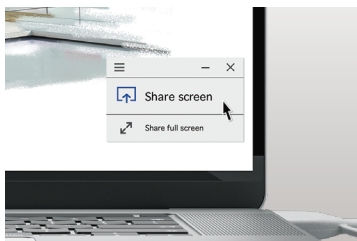

Epson's projectors automatically turn on when it is paired with a transmitter connected to a laptop.

Receiver Functionality is Built In for Epson's Projector Displays*

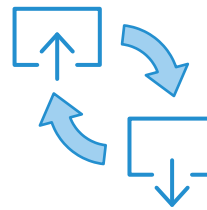

Receiver functionality is built in for Epson's projector displays*, reducing your initial costs.

2 Click the Button!

Just Click and Share! It's That Easy

One click on the app's button and you are displaying on a big screen.

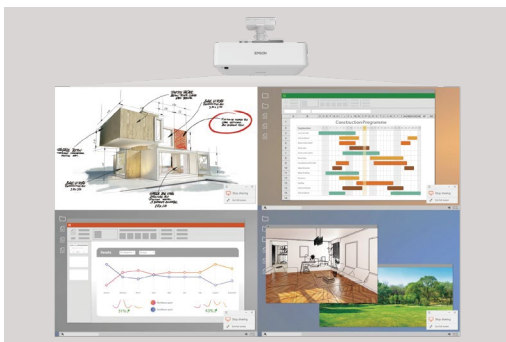

Intuitive Design

It's simple enough that anyone can use it without special training. Multi-screen projection and screen hiding are just as easy.

3 Collaborate on the Big Screen!

Share Up To Four Screens on One Big Screen

You can share up to four screens at once on the big screen. Enhance your productivity by comparing multiple documents on the big, easy-to-view screen.

Smooth Screen Switching

Switching to the next presenter's screen is a breeze. No more interrupting meetings to fiddle with cables or moving to a seat the cable can reach.
