2YWSCP9070	CoverPlus 2Yr Service Pack SC-P9070

[1] At time of installation the end user needs to choose to configure the machine with either Light Light Black or Violet ink. Once this choice has been made it is final and cannot be undone or switched at a later time. 99% Pantone requires configuration with Violet Ink. Configured with Light Light Black provides 98% pantone coverage.

[2] Figures represent print times only for the Epson test sample image as shown, produced on Plain (draft – fine modes) and Premium Photo paper (super fine & super photo modes). Print speeds are engine only with total throughput time dependant on workflow configuration, paper type, software, file format / size, print resolution, ink coverage, networking, and other factors.

[3] New cartridge series. WARNING: It is important that you update your printer firmware to the latest version before inserting this new cartridge series for the first time or they will not work. The amount of ink remaining in a used cartridge may be more than the previous version. For details, refer to the Epson website.

[4] Service Packs enable basic warranty cover to be extended. One or more Service Packs can be ordered in conjunction with the various printer configurations &/or options to enable cover for 1, 2, 3, 4 and 5 year periods (total cover cannot exceed 5 years). Service and support is only provided for product supplied through Epson Australia. This facility is provided in conjunction with the Authorised Large Format Reseller through which the product is ordered. Limitations apply to the provision of warranty upgrades and on-site service. Regional locations and certain installation situations may attract additional charges. Service may be restricted or limited when equipment is used outside of specification &/or with non-Epson consumables. For full details on coverage, terms and limitations please review the warranty terms listed on this web-site and contact Epson Australia or one of our Authorised Large Format Resellers if you have questions or concerns.
