[1] Figures are typical production speeds. They do not include provisions for image processing, transfer, drying or post production. Nominated speeds may not be suitable for all media types and/or applications. Alternate print modes may be employed by RIP s/w for different results.

12L CISS and 4L waste system combine with a high capacity roll feed, a high-precision, and Blower Dryer for efficient roll to roll production.

Advanced tracking and tension control enables output with outstanding linearity and parallelism to suit the most demanding applications including tiling.

The advanced auto head cleaning and filtration systems work with the head guard to ensure superior reliability with low maintenance and reduced cost.

The printer can be managed through the control panel or via Epson Edge Dashboard complete with downloadable print and media profiles, remote e-mail status and error notifications. Epson Edge Print software is powerful yet simple to use with advanced on-screen visualisation.
