

Epson Perfection™ V330 wins Best Photo Scanner!

Each year **Technical Imaging Press Association (TIPA)** recognises product excellence in the areas of quality, performance and value. This year the honour of **Best Photo Scanner** in Europe 2011 was bestowed upon Epson, for the **Epson Perfection V330 Scanner**.

TIPA consists of 29 member magazines from 14 countries all over the world, making it one of the largest and most influential photographic and imaging press associations globally. Every year the **TIPA** editors vote for the best products introduced to the market during the previous 12 months, taking into account innovation, cutting-edge technology, design, ease-of-use and the price to performance ratio of the products.

Epson continually looks for new solutions and ways to enhance our product range. In order to meet the changing needs of our customers. Winning a prestigious **TIPA** award this year for the **Epson Perfection V330 Scanner** is a testament to that commitment and recognition of our achievements as a result.

The new **Epson Perfection V330** Photo is suitable for a variety of applications including scanning photos, documents, thick objects, and 35mm strip film and mounted slide scanning.

Underpinning the perfection V330 Photo's high level of performance is its 4800dpi **Matrix CCD** (Charge Coupled Device) and **Micro Lens technology** combination. With 12 lines of CCD equipped with micro lenses, the Epson Perfection V330 Photo produces quality scans in as little as 16 seconds*.

Adding even greater scanning resolution power is the scanner's ability to move the optical carriage at 9600dpi with Micro Step Drive – a feature that has consistently provided Epson Perfection scanner users with brilliantly clear images exhibiting high colour consistency.

KEY FEATURES:

- **4800 x 9600 Optical resolution** – Outstanding photographic and document scan clarity
- **Exceptional quality** – with Advanced Matrix CCD Micro Lens Technology and an optical density of 3.2 Dmax
- **Versatile film scanning** – with an integrated transparency unit (TPU) for scanning of 35mm film strips and mounted slides
- **Epson's ReadyScan LED Technology** – instant scanning, energy efficiency and environment friendly mercury free LED lamps
- **Slim line design** – sleek, stylish and incredibly powerful
- **180 Degree extendable lid design** – delivers the ability to scan portions of large format documents up to virtually any size
- **Powerful, easy to use software suite** – featuring colour restoration and dust removal to bring faded photos back to life
