| C13S210142 | Head cleaning set |
| C13T736200 | Maintenance kit |
| C13S400215 | Maintenance box |
| C13S210120 | Small platen grip pad |

- When ink has been appropriately applied and fixed. Please refer to the Epson and Oeko-Tex websites for further information.
- One-year standard warranty for all non-consumable components, including printheads when the printer is operated and maintained correctly and used with genuine Epson UltraChrome DG2 ink. Cover can be extended up to a maximum total of 5 years through optional CoverPlus, conditional on activation and connecting the printer to Epson Cloud Solution PORT. Visit www.epson.com.au/coverplus for full details.
- Print speeds are based on an A4 DTG print; actual production times will depend on workflow, material selection, production process, print mode, equipment settings, computing platform, file format/size and networking.
- Optimum DTG require garments with a moderate to loose weave and 50% or more natural fibre content. Supports a wide range of single and mixed fibre fabrics garments with appropriate pre-treatment, (print adhesion and wash durability may vary). DTFilm is recommended for material with tight weave and/or elevated levels of synthetic content. Special care is required with fabrics that have been coated to repel dust and/or moisture. Image quality and wash/wear durability checks are recommended before production.
- Images must be preprocessed using Garment Creator and stored on a USB device with a maximum capacity of 2 TB, formatted in FAT-32.
- Both DTG and DTFilm processes require a heat press. DTFilm involves extra film and powder (an additional oven is generally recommended). Contact an Epson authorised dealer for the optimal product choice.

The image displays the Epson Cloud Solution PORT web interface. It features a top navigation bar with the 'PORT' logo and a main content area with four distinct sections: 'Production Tracking' (represented by a bar chart icon), 'Cost & Usage Analysis' (represented by a magnifying glass over a bar chart icon), 'Remote Monitoring' (represented by a smartphone icon with a magnifying glass), and 'Advanced Service & Support' (represented by a person wearing a headset icon).
