Epson Exhibition Canvas Natural Matte and Satin

Epson Australia have released two new canvas media products. Exhibition Canvas Natural Matte and Exhibition Canvas Natural Satin.

Currently available in two roll widths of 13 inch and 17 inch, which is a perfect fit for the Epson SureColor SC-P600 and Epson SureColor SC-P800.

To get the best results from the Canvas please follow the following steps.

Download the Epson RGB Printing Guide for information using ICC profiles

Download and install the Epson ICC profile for the Canvas media required, which are available with this information.

Driver Setting:

For the Matte Canvas use the WaterColor Radiant White, Media Type in the Driver Using Matte Black Ink

For the Satin Canvas use the Epson Premium SemiGloss, Media Type in the Driver Using Photo Black Ink

Follow the instructions in the RGB Print Guide to correctly set up the ICC and driver

When printing with Canvas media it is important to allow at lease 1-2 hour for the surface to be touch dry, this is just a characteristic of these products. It is also advisable to use a spray sealer to protect the surface, this also has the added bonus of extending the longevity of prints beyond the already impressive archival qualities of Epson ink and media combinations.

There are a number of quality spray coating available from the Epson Prographics Dealers, which can be found on the Epson website.
